

Visually Attractive Roadsides

Waimate 2020

Visually Attractive Roadsides

What Do We Do Now?

Council develops and tends to the mowing and plantings at various roadside locations within the Waimate District, especially at entrances to urban areas. Council owned properties and Road Reserves are similarly maintained.

The maintenance of roadsides is also a major component in providing for safe vision for drivers.

Other than safety works, full roadside mowing is limited to Waimate Township, Queen Street to the ford and Horgans Road.

Tasks

Tasks are the routine matters that Council will attend to every year, in order to maintain service levels set in agreement with our community.

- Mow grass and maintain plantings using Parks and Reserves Staff, a major roading contractor or individual local contractors.
- Ensure that the 3 entrances into Waimate township are all attractive and well-maintained.

Why Do We Do It?

For reasons of community pride, road safety and to promote economic development by attracting tourism.

Our Service Levels

Urban roadsides are mowed so as the grass growth does not exceed 100mm.

Rural roadsides are mowed so as the grass growth does not exceed 150mm.

Outcomes Supported By This Activity

This activity supports the following Community Outcomes as described in the second volume of this plan.

- The security and safety of the community and its citizens meets their needs.
- The District is visually attractive.
- The natural and rural environment is protected.

How Do We Get There?

The Council will play its part in achieving the above outcomes by continuing to conduct the relevant tasks that we do now and by extending into new projects as agreed with the community.

Projects

Projects are special works that are initiated by Council which by their development and ongoing maintenance will enhance community outcomes.

- Conduct a tree planting program for McNamaras, Timaru and Gorge Road roadsides.
