SWIMMING POOL FENCES CUSTOMER INFORMATION

Alternative Solution for Paling or Corrugated Steel Fences

Where the rails of closed paling or corrugated steel fences are on the outside of a pool fence and are closer than 900mm,

the Council accepts, as an Alternative Solution to satisfy the Building Code and Fencing of Swimming Pools Act, the fixing of a triangular fillet on the top side of the centre rail.

The fillet must be H3.1 treated, be minimum 100mm high x width of rail, and fixed to the top of one or more rails so that the climbable rails are 900mm minimum apart. (Refer to bottom sketch for examples.)

Thank you for trying deskUNPDF. Our free trial converts only the first page of a document, allowing evaluation of the product's fidelity and accuracy.

If you require more than a one page conversion or are interested in purchasing the product, we welcome you to visit www.docudesk.com to learn more about deskUNPDF as well as our other PDF conversion products.
