

Construction Statement for Reused Log Burner.

I the undersigned have inspected the log fire and found the heat exchanger, combustion chamber, protective liners are secure and in good condition.

All welded joints, doors, dampers and their hardware are also in good condition.

The fire has not been modified from manufacturer specifications.

The fire complies with AS/NZ standard 3869:1999, Specification for solid fuel burning domestic appliances and AS/NZ standard 2918:2001, Specification for installation of solid fuel burning domestic appliances.

I am on Waimate District Councils List of approved Producer Statement Providers
