

Installation of Second Hand Logburner – for over 2 Hectares only

I the undersigned have inspected the log fire and found the heat exchanger, combustion chamber, protective liners are secure and in good condition.

All welded joints, doors, dampers and their hardware are also in good condition.

The fire has not been modified from manufacturer specifications.

The fire complies with AS/NZ 3869:1999, Domestic solid fuel burning appliances – Design and Construction. Specification for solid fuel burning domestic appliances and AS/NZ 2918:2018 – Domestic solid fuel burning appliances – Installation.

I am on Southern Building Control Groups (SBCG) List of approved Producer Statement Authors.

Construction Statement for Reused Flues:

I the undersigned have removed the flue, disassembled, inspected, and certify that:
(cross out those items that do not apply)

- The flue was found to be in good condition with no faults found and in a suitable condition for reuse.
- The flue pipe is constructed of austenitic stainless steel.
- The flue is not suitable due to its condition for reuse and is to be replaced with a new flue system that complies with the manufacturers installation requirements.
